Significant State Activity

Other Immediate Concerns

- Active** The most significant rises are forecasted for the Lower Weber River at Plain City, the Little Bear at Paradise, and East Canyon Creek near Jeremy Ranch downstream to East Canyon Reservoir. [See Hydrologic Outlook here](#) [NWS Twitter]
- Active** Current flood risk is spring runoff, increasing streamflows, and snowmelt. Some reported flood-related landslides are being monitored.

Current State (SERT) Actions

- Update** Activated Emergency Support Functions: ESF #1, ESF #5, ESF #14, ESF #15, ESF #16, Logistics, VDCT, Volunteer Agency Liaison (VAL), and Finance.

Current Operational Requests

- Update** 9 active requests are in progress regarding State sandbag resources, management of State volunteers, additional SEOC staff, other flooding response resources, and information regarding the ability to assist with flooding from USACE. 1 active request is assigned for critical infrastructure and 1 active request is pending additional information for flooding response. [WebEOC]

Region 1

Cache County

- Active** The Bureau of Reclamation, Utah Division of Water Resources, and Cache County are actively monitoring the Hyrum Dam for potential high-flow releases in the Little Bear River. [Bureau of Reclamation, Interagency Correspondence]
- Active** Due to the heavy snowpack, the county has also determined that it is necessary and appropriate to [extend the seasonal restrictions](#) on county roads to motorized vehicles until at least May 15th. [Cache County]

Morgan County

- Active** The NWS has advised the County that East Canyon Creek will go above flood stage into the first part of this week. [NWS, LNO Correspondence]

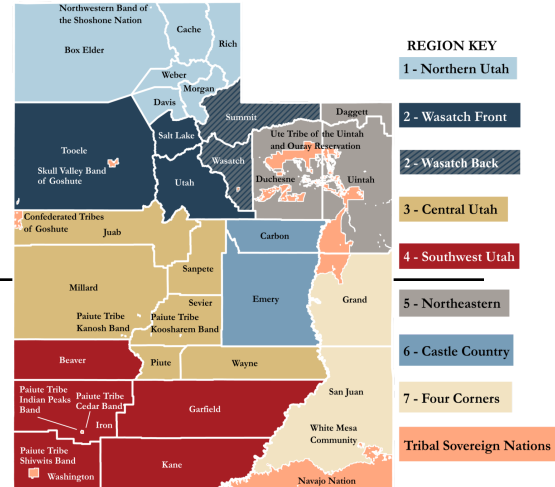

Rich County

- New** Garden City has activated a partial incident command to monitor flooding. [LNO Correspondence]
- Update** Garden City experienced flooding actively crossing the highway into Bear Lake, though the road has not shut down. The flooding slowed due to the cooler temperatures overnight. [LNO Correspondence]

Region 2

Salt Lake County

- Update** Emigration Canyon - There is some road damage and some culvert damage. No active damage assessments have been conducted thus far. SLCo plans to have crews in Emigration Canyon all night working to clear debris [SLCo Flood Control]
- Active** Sugar House Park is closed through May 1st for continued controlled releases. [SLCo Parks & Recreation]
- Active** SR-190 is closed today (5/1) from 11am-5pm due to avalanche hazard. [UDOT Canyons]
- Active** SR-210 closed today (5/1) at 8 am due to avalanche hazards. No ETO for any public travel periods. [UDOT Canyons]

TLP: WHITE

Disclosure is not limited.

Utah County

- **Update** SR 89 closure at Highway 6. They have a hard closure in place on both sides of the closure. We will have troopers in the area monitoring traffic. UDOT is planning on trying to fix the berms and pump out as much water as they can. It is undetermined how long the closure will be. UDOT is also concerned about Spanish fork creek which runs under I-15 at mile 254. There are concerns that it may get to a point it will affect traffic in that area. We will keep monitoring it.

Region 3

- No significant updates to report at this time.

Region 4

Garfield County

- **Active** Asay Creek continues to run high and the Sevier River is flooding the lowlands. [LNO Correspondence]
- **New** Sevier River is currently above flood stage, but no reports of damage at this time. Continuing to monitor. [LNO Correspondence]

Region 5

- No significant updates to report at this time.

Region 6/7

Grand County

- **Active** Dolores River - Predicting a rise of greater than 16 feet, putting Dolores River over its bank at the University of Utah's Bonderman Field Station at Rio Mesa. This is earlier than anticipated, before the spill release of the McPhee on May 4th. [LNO Correspondence]

San Juan County

- **New** Seeing higher flows on area rivers and streams. They are seeing some flooding in some roadways and near subdivisions that have been developed next to historic agricultural ditches or subdivisions that have not been properly developed for drainage (Specifically Spanish Valley). [LNO Correspondence]

Tribal Nations

- No significant updates to report at this time.

Impact and activity information is provided by Local Emergency Management partners, the State Emergency Response Team (SERT), and private and non-profit partners through various coordinating communication channels. This is a developing situation, and information may quickly become outdated. Additional situation reports may be made as verified information becomes available.

- **Active Flood Watch** for the Little Bear River below Hyrum Dam to Cutler Reservoir, East Canyon Creek near Jeremy Ranch to East Canyon Reservoir and the Lower Weber near Plain City .
- **Active Hydro Alert** for Weber River at Plain City, observed flood stage is: Near Flood.
- Cooling temperatures Thursday into Friday will slow any remaining snowmelt.

CURRENT FLOOD WARNINGS

Sevier River Near Hatch

River Flood Warning

Weather Risk

- 4 EXTREME
- 3 MAJOR
- 2 MODERATE
- 1 **MINOR**
- 0 LITTLE/NONE

A MINOR (1/4) Weather Risk means... Rivers in rural portions of Utah will reach or exceed flood stage

What to expect...

Spring snowmelt runoff will result in flows exceeding thresholds for flooding along the Sevier River near Hatch.

- **The river is expected to oscillate around flood flow through Friday morning.** Flood flow for the Sevier River near Hatch is 3.9 ft.
- **The river will peak late Monday night** near 4.0 ft. Flows will decrease into the weekend.

What to do...

If you are in the flood area, consider strategies to mitigate damage including sandbags or relocating property to higher ground.

Use caution in any areas impacted by flood waters. Turn around, don't drown!

Monitor social media, broadcast media and/or [weather.gov/slc](https://water.weather.gov/slc) for latest updates to watches and warnings

South Fork of Ogden River

River Flood Warning

Weather Risk

- 4 EXTREME
- 3 MAJOR
- 2 **MODERATE**
- 1 MINOR
- 0 LITTLE/NONE

A **MODERATE (2/4)** Weather Risk means... Rivers will exceed flood stage in populated areas.

What to expect...

Spring snowmelt runoff will result in flows exceeding thresholds for flooding along the South Fork of the Ogden River near Huntsville.

- The river is expected to oscillate around flood flow Tuesday through Thursday. Flood flow for the South Fork of the Ogden River near Huntsville is 4.6 ft. or 992 cfs.
- The river will peak Friday morning near 5.3 ft. or 1500 cfs. Flows will decrease into the weekend.

What to do...

If you are in the flood area, consider strategies to mitigate damage including sandbags or relocating property to higher ground.

Use caution in any areas impacted by flood waters. Turn around, don't drown!

Weber River at Plain City

River Flood Warning

Weather Risk

- 4 EXTREME
- 3 MAJOR
- 2 **MODERATE**
- 1 MINOR
- 0 LITTLE/NONE

A **MODERATE (2/4)** Weather Risk means... Rivers will exceed flood stage in populated areas.

What to expect...

Spring snowmelt runoff will result in flows exceeding thresholds for flooding along the lower Weber River at Plain City.

- The river is expected to reach flood flow Tuesday afternoon. Flood flow for the lower Weber River at Plain City is 27.0 ft. or 4598 cfs.
- The river will peak Wednesday afternoon near 27.3 ft. or 4700 cfs. and oscillate around flood stage through Friday night. Flows will decrease into the weekend.

What to do...

If you are in the flood area, consider strategies to mitigate damage including sandbags or relocating property to higher ground.

Use caution in any areas impacted by flood waters. Turn around, don't drown!

Emigration Creek Flooding

Through Thursday Morning

Weather Risk

- 4 EXTREME
- 3 MAJOR
- 2 **MODERATE**
- 1 MINOR
- 0 LITTLE/NONE

A MODERATE (2/4) Weather Risk means... Rivers will exceed flood stage in populated areas.

NATIONAL WEATHER SERVICE
NATIONAL OCEANIC & ATMOSPHERIC ADMINISTRATION
WEATHER.GOV/SALTLAKECITY

What to expect...

Spring snowmelt runoff will result in flows exceeding thresholds for flooding along Emigration Creek in Emigration Canyon and the east bench of Salt Lake City.

- **The creek has exceeded flood flow** Sunday night. Flood flow for Emigration Creek is 130 cfs.
- **The creek will drop below flood flow** Monday morning, but is forecast to have additional peaks near or above flood flow through Wednesday night, resulting in minor flooding.

What to do...

If you are in the flood area, consider strategies to mitigate damage including sandbags or relocating property to higher ground.

Use caution in any areas impacted by flood waters. Turn around, don't drown!

Monitor social media, broadcast media and/or weather.gov/slc for latest updates to watches and warnings
